

SANCTUARY® DEFENSE KILLS 25 TYPES OF BUGS

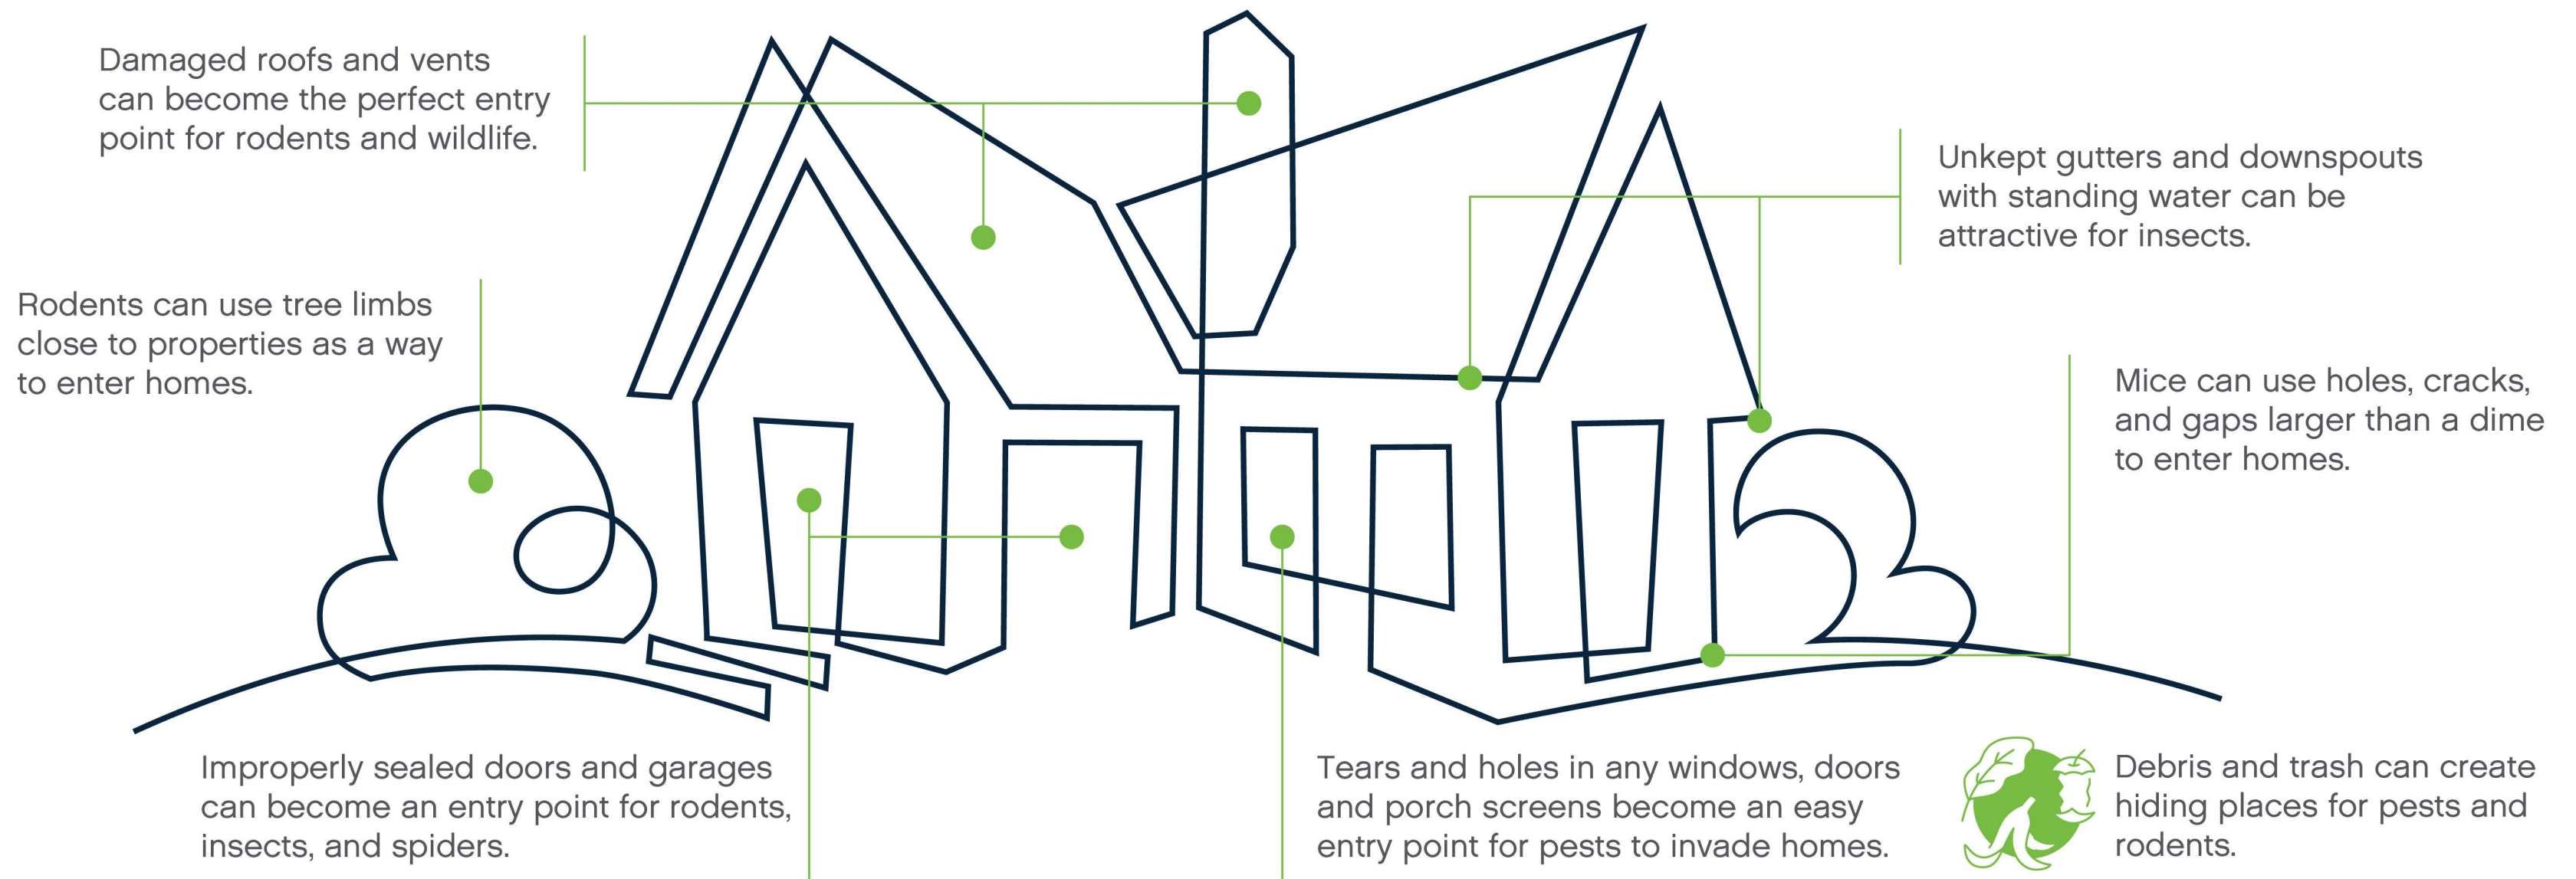

BORABARRIER® WILL PROTECT THE INSULATION FROM THE FOLLOWING PESTS:

Ants, Bat Bugs, Booklice, Boxelder Bugs, Centipedes, Cockroaches (including Florida Woods Cockroach), Crickets, Darkling Beetles, Dermestids, Earwigs, Firebrats, Fleas, Flies, Kudzu Bugs, Lady Beetles, Millipedes, Mites, Pillbugs, Silverfish, Slugs, Snails, Sowbugs, Stink Bugs, Termites (including Formosan), and Water Bugs.

COMMON PEST ACCESS POINTS

ANTS

- Ants are the #1 nuisance pest in the U.S.
- Attics are an excellent place for carpenter ants to reside because they are wood-destroying organisms

COCKROACHES

- Cockroaches are known to spread 22 kinds of bacteria, including E. coli, Salmonella, six types of parasitic worms, and seven types of human pathogens
- 63% of homes in the U.S. contain cockroach allergens

TERMITES

- Termites are known as “silent destroyers” because they can chew through wood, flooring and wallpaper while going undetected
- They alone cause over \$5 billion in property damage annually, a cost that is not typically covered by homeowners insurance policies
